

**Sosorbaram Bayaraa**  
Full Stack Software Developer

## ABOUT ME

A full-stack .NET software developer with experience in building multi-tiered web applications. I went to school at SFSU where I pursued a Bachelor's degree in International Business. I have always been a technology enthusiast and recently changed career paths to enter the technology field because I understood how important is to learn technology skills. My goal is to become a senior developer so that I can contribute to the programming community.

During my time training at Revature, I've worked on several projects where I gained experience in both backend technologies (including C#, SQL, ASP.NET, and microservice architecture) and frontend development (including HTML, CSS, JavaScript, and Angular). I also have experience with DevOps and CI/CD pipelines, deploying to the Azure cloud and docker. I really enjoy collaborative team environments where I can learn from others, and I have worked hard to improve my communication skills to become the best team player. I am highly motivated and look forward to applying all my skills and prior experience in a position on your team.

### Education & Certification

#### Bachelor's Degree - International Business

San Francisco State University - Oct 2015

#### Associate's Degree - Fashion Design

College Of Alameda - Jun 2013

GPA : 3.5

### Skill Matrix

All durations represent Equivalency

Back-End Technology Technology

- C# (3 Months)
- Microservices (3 Months)
- ASP.NET Web API (3 Months)
- ADO.NET Entity Framework (3 Months)
- .NET (3 Months)

## P1 - Expense Reimbursement System API (.NET NG Ext v1)

This project is an API for employees to submit reimbursement requests and managers to approve or deny the submitted requests. The Expense Reimbursement System (ERS) will manage the process of reimbursing employees for expenses incurred while on company time. All employees in the company can login and submit requests for reimbursement and view their past tickets and pending requests. Finance managers can log in and view all reimbursement requests and past history for all employees in the company. Finance managers are authorized to approve and deny requests for expense reimbursement.

### Environment / Technologies

ADO.NET, ASP.NET Core Web API, C#, Azure SQL Databases, Sql Server
